Wellosophy Files Suit in Federal District Court in Dispute with ForeverGreen™ International, LLC; and Pre-Launches Wellosophy™ International, LLC, - a new Network Marketing Company to Supply SWELL®

FOLSOM, CA April 14, 2009 — Wellosophy™ Corporation filed suit in Federal District Court on Friday seeking injunctive relief from ForeverGreen™ International, LLC (OTCBB:FVRG). The allegations state that ForeverGreen: 1) is insolvent; 2) has failed to make payments; 3) has misled the public as well as its O3World distributors by failing to disclose material information regarding the termination of the SWELL® supply agreement in February, and 4) has violated US copyright and trademark laws with respect to the SWELL® technology; among other charges.

Lior Sher, JD, Wellosophy's Chairman and CEO stated: "Wellosophy has been supplying SWELL®, our revolutionary weight loss dietary supplement ingredient, to FVRG since mid 2008 under the terms of a private label agreement for their "FORM™" brand. Although we have worked diligently to support ForeverGreen's remarkable success with SWELL® and even more so to resolve this dispute amicably, we have been left with no alternative but to resort to litigation in order to conclude these serious outstanding issues. Ironically, the loss of the ForeverGreen relationship has created an exciting new opportunity for Wellosophy to work directly with the millions of network marketers worldwide seeking a revolutionary breakthrough in an MLM-proven weight management solution for their businesses."

Dr. Richard Davis, MD, Wellosophy's President and Chief Science Officer continued by saying: "Wellosophy™ International, which owns the exclusive rights to commercialize the SWELL® technology in the MLM channel, will be pre-launching in May. We are very confident that industry leaders worldwide will recognize that the synergies created by the SWELL® pre-meal gastric bulking technology, the company's philosophy, our seasoned management, the sustainable product mix, our commitment to integrity and innovation, and one of the highest-paying compensation plans in the MLM industry, combine to provide a fresh and unsurpassed new opportunity with a broad global appeal."

About Wellosophy™ International, LLC: - a direct sales company whose mission is to provide outstanding ground-floor opportunities to independent business owners around the world seeking to sell innovative, highly-proprietary, and clinically-tested, health and wellness products that can make significant and lasting impacts in people's lives. As a vertically integrated business, Wellosophy is uniquely positioned to deliver exclusivity, low price-points, and high-value in this competitive industry. The flagship product PREE™ is being pre-launched into the MLM channel in May; and is being accompanied by a series of novel, high-quality dietary supplements and whole foods meal replacement lines built around the SWELL® core technology. These products have been uniquely formulated to meet the special nutritional requirements, metabolic needs and physiologic challenges of people seeking to lose and manage their weight; which is one of the largest consumer markets in the industrialized world.

About SWELL®: - a highly proprietary, patent-pending, pharmaceutical-grade, microbead, hydrogel polymer designed for use as a pre-meal gastric bulking agent. SWELL® microbeads have the amazing ability to gently expand 500x to 1,000x their size in about one minute when activated by water. The expanded microbeads have a very slippery gel-like consistency much like caviar. When ingested 30 to 60 minutes prior to meals, the microbeads collectively expand to create a volume about the size of a Big Mac®; which promotes a sense of early satiety (fullness) at mealtime. The indigestible bio-inert beads are retained in the stomach for 2 to 3 hours; then safely pass through the GI tract and are eliminated naturally - without any known harmful side effects. SWELL® has completed two multi-center clinical trials which documented progressive weight loss averaging about 8 pounds per month - without significant side effects. A 100-patient study is scheduled for completion by year end designed to add product claims directed toward diabetics.

Anyone seeking further information is asked to visit the Company's website at: www.Wellosophy.com. SWELL® and PREE™ are the exclusive trademarks of Wellosophy™ Corporation. The US Food and Drug Administration has not evaluated any of the statements made in this press release. Neither PREE™ nor SWELL® is intended to diagnose, treat, cure or prevent any disease.
